

Artist Statement

Ekta is primarily a colored pencil artist, who enjoys capturing the beauty of nature in her artwork. She also loves the play of light and shadow on faces, and likes to utilize the simplicity of graphite to portray the complexity of wrinkles on paper. As the need for reference photos arose, she branched out into photography which has evolved into a full-blown passion. She believes art is a never-ending evolution of the creative mind and is constantly experimenting with different media including acrylics, charcoal, pastels, pen and ink, and chalk; various surfaces such as tiles, wood and burlap; genres ranging from realism to cubism; and diverse subjects including, but not limited to, flowers, people, insects, pets as well as abstract renditions of the same.
