

Artist Statement

05.24.2017

My name is Shereen Mordaunt, and I am a graphic designer and artist. My mediums of choice are Gouache, watercolor, and pen and ink. My art reflects my love of the natural world. My love of flowers, leaves and creatures of the forest often shows in my art. I am heavily influenced by folk tales, and folk art, and by old botanical plant identification books. Having become a mother has brought a playful whimsy to my works as well, and my son is always bringing me flowers and leaves to sketch, which I love.

I prefer working in small format, and I bring my sketchbook with me everywhere to capture inspiration. I then paint the sketches in gouache, then scan my work into digital format where I combine different motifs to make pleasing patterns and compositions. Occasional I also work purely digitally, but I always sketch first by hand.

My aim is to bring fun affordable art into people's homes via surface patterns and prints. Nothing makes me happier than seeing someone carrying a tote with my art on it, or seeing a print of mine on someone's wall.
