

## **ARTIST STATEMENT**

S. Angelina Allison

In affiliation to me creating a piece of art it can be the most vulnerable thing to achieve you put your world out there to be loved or hated it really makes no difference. To cause a brief bit of emotion that is the “thing” everyone tries to actualize and obtain as an artist.

My upbringing might have been a tough childhood I used my art and imagination to escape my present but now I use it to celebrate my future and overcome my past to grow into a stronger artist.

I devote myself in imagining and creating with pen and ink exceptionally with microns in stippling/ pointillism technique it has been a skill I have tried to specialize myself in to reflect my certain style for nearly two decades. My work contains surreal imagery, grasping at ideas and thoughts from my imagination. I try to develop creative art pieces and to be able to showcase them in front of a crowd and receive feedback that is the only way to succeed as an artist.
